WORK HISTORY

iOS Developer, 05/2017 to Current - Full Time

Johnson & Johnson – Providence, RI

Currently building Health Care applications for the internal Johnson & Johnson medical research team.

Creation, maintenance and deployment of medical applications (HIPPA regulated) in swift and objective-C.

Consistent reduction of bugs, errors, and memory leaks in already deployed apps.

Learn from/Help senior devs with Node issues.

Assist interns with software development process, CI/CD, Git, iOS design patterns and best practices.

Staying up to date in the latest libraries, patterns and technologies revolving around Apple/iOS development.

iOS Developer, 05/2016 to 09/2016 - Contract

NYG Strategic Marketing Consultant – New York, NY

Developed an iOS app and simple backend for a start-up idea, "The Neighborhood" for NYG's CEO, Brock James. Using Amazon Web Services and Stripe the development team incorporated recurring payments,

custom analytics and other custom features into the android and iOS app. Unfortunately the app was never launched.

Programmer/Instructor, 02/2016 to 05/2016
